Yale Library - Dr. Brewster
Apr 12. 1903

Dear Mr. Brewster,

In looking over my
bird notes for arrivals &
departures at Neapolia I
came across some for the
Cambridge region, which may
possibly be of interest to you
although you have had so
many record breakers lately
that I dare say they are
of no value - However, I
send them on the chance -

[9 were entered there in
the Lys. Notes as 1 bird in each
case -

Fox Sparrow } have in locality
Red Wing }

W.D.]

Blue bird . Arlington Feb 22. 1882

✓ (1 seen) Many land yellow throat Arlington (Huron
Nov 8. 1879 Grand)

[Phoebe]
1 shot] Blue Belmont Nov 15. 1878.

(1 seen) Tree Swallow. Belmont Oct 17. 1878.

Cat bird Arlington Oct 6. 1878

✓ Fox col. Sparrow Dec 6. 1878.

Red wing h. b. Dec 9. 1878.

→ Mr. J. R. Mann tells me
he heard & saw a pine Creeper
in the woods at Arlington on March 29th
of this year -

Yours.

C. J. Townsend -

Yemassee St. Boston.

May 9, 1904.

Dear Mr. Brewster,

I must let you know that I obtained from a farmer at Ipswich yesterday a Dilomis plow that he had shot but a short time before. Isn't that a great find! I suppose he had wandered north with other Stone birds. Winter yellow legs were abundant & very much in evidence with their whistling. I also saw 6 or 7 least sandpipers, 3 black-bellied plovers & 1 Semipalm-plover. The latter could not I suppose

Townsend - C.H.

May 9. 1904.

has been a Wilson's plover as

I heard its familiar call
note, & ~~the~~ the books say

the Wilson's plover has a
very different note.

Yours best regards

Yrs.

C. Townsend.

CHARLES W. TOWNSEND, M.D.
76 MARLBOROUGH ST., BOSTON.
OFFICE HOURS,
2.30 TO 3.30 P.M.

Aug 15, 1906 -

Dear Mr. Brewster,

I want to

Congratulate you very much
on the successful completion
of your great work on the
Birds of the Cambridge Region.
I have been so busy since
I came back from Labrador
a few days ago that I
have not had time to
look at the book, but
I hope to be able to get

at it here & long, & I am
expecting a great treat.

We had a fine time
in Lahadn - most
interesting in every
way - and a great
deal to tell,

Yours very sincerely

Charles W. Townsend.

7 Marlborough St. Boston

Sept 13, 1916 -

Dear Mr. Brewster,

I have been reading
your "Birds of the Cambridge
Region" at my solitary meals
and have just finished it.

It is unnecessary to tell you
how much I have enjoyed it,
and I can thoroughly appre-
ciate how much work it
represents.

That it will always be
a valuable work of reference
to the bird life in Cambridge

during the past and at
the present time goes without
saying - It will also
serve as a model of careful
and thorough work for all
writers of local lists.

I hope you are having
a delightful time in the
Country. As for myself, -
English Sparrows are about the
only birds I see. However,
I am living on the remembrance
of Labrador!

Yours very sincerely,
Charles W. Townsend.

76 Marlboro St. Boston.

Jan 1. 1907.

Dear Mr. Brewster,

I should be
much obliged if you
will submit the matter to
the Council. I should need
the lantern for the first
talk only - a general description
of the Lubahn Court, ^{+ general ideas} _{60 lantern slides}
In case the Council decide
against it, I will omit that
talk + give the second only. _(notes on the slides)
Wishing you a happy New Year
Yours Charles W. Townsend.

76 Marlborough St. Boston.

March 1. 1907.

Dear Mrs Brewster,

I have been looking
into the subject of lanterns and
find that an excellent lantern,
Darlow lens, using electricity,
can be bought of A. D. Hardy
12 Bromfield St for ^{\$}5.00.

At 20 ft it gives a field
about 6 x 7 ft with very good
definition. It is easily
managed and it would I
think be an excellent investment.

in the Nottall Club.

Many of the members take
photographs, and with a
good lantern there would be
an inducement to bring lantern
slides to the meetings -

I intend to bring this matter
up at the next meeting, but
I have written you this in case
I should be prevented from
coming.

Yours sincerely,

Charles W. Townsend.

76 Marlborough St. Boston.

August 17, 1907.

Dear Mr. Brewster,

You will be interested
to hear that I shot an adult
♀ leucorhynchialis at Ipswich
which will prove, I think,
to be an unusually interesting
specimen for study. It was
feeding one young and was only
I watched them for $\frac{3}{4}$ of an hour
before shooting - which I also
did. It was a Chrysoptera.

I also saw an adult Prairie
Horned Lark at Eagle Hill & 2
Caspian Terns on Ipswich beach.
But my month's vacation is over

I am sorry to say, & I am
back at work in Boston.

I was very glad to hear
from you. I came over the
telephone the other day that
you had been at Umbagog -
I hope your work on the
side of that region is
progressing.

It looks as if Brewster's
Inn would soon become one
of our familiar door-yard sides!

Very sincerely,

Charles W. Townsend

Boston 76 Marlboro' St.

Aug 20. 1907.

Dear Mr. Brewster

Since writing you
about my supposed leucorhachis,
I am growing doubtful, &
from considering it leucorhachis
with links between it and
Chrysoptera as I first supposed,
I am not sure but it may
turn out to be merely a very
light throated ♀ Chrysoptera.

Francis Allen & Spelman to
whom I showed it at
Spencer thought it was
leucorhachialis, and if it

is it is an unusually
interesting specimen.

hope to go over the series
in your collection with

Mr. Deane soon so as
to be able to decide.

I merely wish here to
retract the printer's statement
I made just.

Very Sincerely,

Charles W. Townsend.

Yale Natural History Dept. Boston.
March 11, 1908.

Dear Mr. Brewster,

I am perfectly willing to
have both the records you refer to cancelled
if the Council see fit, but I am
satisfied that these records are good for the
following reasons:

1834 among a female Baldpate at Ipswich
Oct 20, 1907. These were seen by me again
on Oct 27 in the same place. Glover Allen
& Nichols were with me the second time.
I feel almost sure that Dr. John Phillips
told me that ^{he} saw them also, but I can
not confirm this latter statement for
Mr. Phillips is abroad.

Furthermore I identified the birds
with strong Lieder binoculars (not opera
glasses) and a telescope, and I had
a good chance to study them as they
stood up in the water to flap their

mingo, or tipped up & showed their
under Coverts & lower bellies.

2^d The Jamaica plain ducks.

There is no doubt but that these birds
had blue gray & not white wing marks,
hence it was a matter of size to
determine whether they were Ring-necked

& Red heads. Knowing there
were Mallards, ^{Blacks,} & Ruddies as they
found I carefully compared specimens
of all ~~four~~ species in my collection
before going to the pond, and again on
my return. The birds were all

seen close together, at times not
more than sixty yards off so that
I was able to compare their sizes.

I say in my notes made on the spot:

"They are much larger than *E. jamaicensis*
of which I hear, & not much smaller

than Mallards & Blackes. - So I
concluded they were all Redheads

I should like to see three
♀ Gadwall & eleven Ring necks
very much!

Don't mind throwing out
the records - I shall not
feel hurt the least bit, but
I am satisfied I used due
care, & had good strong glasses
& was not engaged in hunting
for eggs, shooting or photographing
at the same time

Yours
Charles W. Townsend.

March 16, 1909.

7 Marlboro St. Boston.

Dear Mr. Brewster,

In referring to my notes
I find several points not
mentioned by Allen last night
in the Courtship actions of the
Whistler. I have also seen

these actions in November, an
example of the "autumnal
recrudescence of the amatory
instinct". I mentioned these

slightly these actions in the
"Birds of Essex Co." but I had not
then made any study of them.

Willie H. Moore, Scotch Lake,
N. B. in Bird Lore, Oct, 1900, vol II, p. 157.

Gives a brief description of these
Courtship actions and describes
the note omitted. I did not
read this volume of Bird's
until after I published Essex Co
He certainly had an
interesting meeting last night.

I hope you will write out
your paper on the Courtship
of the Golden-eye & read
it at the N.O.C.

Yours

Charles W. Townsend.

The first time I heard this ~~note~~^{song}
of the Whistler was here 6th, 1906 -

7 Elmwood Ave. Boston

Nov 11, 1909.

Dear Mr. Brewster,

I have had sent
me a head and portion of
the skin of a Ruffed Grouse
typical in plumage but with
a red bare patch above the

eye. The head of another
^{no skin but preserved}
shows this bare patch almost

to the extent of a comb as
in the Spruce Partridge.

Boston birds were shot in

this State. Yours Boston

We have this pattern or is
it possible that the presence
of this pattern in a bird
otherwise typical of Borneo
indicates hybridism with
the Spruce Partridge? Is
there any chance of hybridism
with the European Black Grouse?
(i.e. with no skin attached)
The first head was somewhat
larger than Borneo blue was made
we think of the Black Grouse
Very truly
Charles W. Townsend.

CHARLES W. TOWNSEND M.D.
76 MARLBOROUGH ST BOSTON
OFFICE HOURS.
2.30 TO 3.30 P.M.

March 17. 1910.

Dear Brewster,
It was on March 15th 1910 about 5 in the afternoon that I saw the Horbell's Grebe in the Back Bay Basin of the Charles River about a hundred or a hundred + fifty yards off the end of Fairfield St. It appeared to be in adult or partially adult plumage, although I could not see the color of the lower neck as I had no glasses + the light was bad - It was actively diving (with wings closely folded as it went under water) + appeared on one occasion to be eating a small fish. Our new members + our dinner last night were certainly successful!
Yours - Charles W. Townsend.

Helena Ave. Boston.

July 6. 1960.

Dear Brewster,

I have just read with
much interest your reply to
Bright about the Red-legged Black
Duck and it seems to me
that your arguments are all
good & more excellently &
moderately stated. Particularly
you make it clear that he
has only one heading bid to
found his evidence on, & that
as you show may have been
an escaped Park bid.

The name I read and

Observe + think on the subject,
the more interesting a one it
seems to me, + the less I
wish to state any opinion.

I am sure that Mr. Wright
deserved an answer to his
paper, + he was fortunate
to have such a cautious adver-
sary as yourself.

When can you go with me
to see the year old pair of
Black Ducks in Soledad Bay?
I have not seen them for some
time + am anxious to look
them over with you.

Yrs Sincerely,
Charles W. Townsend

THIS SIDE OF CARD IS FOR ADDRESS ONLY

Mr. Wm Brewster.
Brookline.
Cambridge
Mass.

I saw the Bl. ducks yesterday ev.
+ am very much interested in
their progress which seems now
to be having out your views. I
want to see them again in Oct or
Nov.

Yrs.
Civ. Townsend.

July 14. 1910.

Waltham, Mass. Boston.

May 3, 1911.

Dear Brewster,

I was much interested
and amused by your letter.
Of course it was the only thing
I do, & I am only sorry that the
notice of Thayer's talk could not ^{have} been
given so that some members could
have been present. The Mergansers

can wait till next time.
I am sincerely sorry for Thayer,
but as he is so supremely confident
of himself and his theory, I dare
say he does not need sympathy.

What you say about his expressions
of absolute truth and absolute fact
as regards his theories, goes to
show of course how daft

the poor man has become on
the subject.

I am sure we did right
in discussing with him, although
like you I thought at first
it was nice to say nothing.

I hope he will not come again!

He can not accuse us of being
fair-hearted like F. H. A. ! I only

hope that I was not discourteous.

I was sorry to learn before it was
over but I had to make a

late visit.

I thank you very much
for the copy of the Concord & I
enjoyed reading your paper again.

Yours
Charles W. Townsend

76 Marlboro' St. Boston.

August 23, 1911.

Dear Brewster,

I hope you have not
forgotten that you are coming
down to spend a Sunday
with me at Ipswich. There
has been a White Egret, so I'm
told, there lately & still
Sandpipers & others at Clark's
pond. It shall be
most delightful to have you
come any time that is
convenient to you if you

Will set the date -

I heard from Glover Allen
what a good time you
had with the birds of the
Atlantic.

I have finished my paper
on the Black Duck & have
these titles for it which I
offer for your criticism

"The Validity of Brewster's Red-legged
Subspecies of Black Duck"

"The Black Duck - a vindication
of Mr. William Brewster"

Perhaps you can give me a
better one — I left

23rd

Write Drane a Copy of
"Captain Cartwright and his

thinking you would not care
to be troubled with it while
you were visiting. It has
just come out.

I had a delightful time
in my vacation going with
my whole family for a
four weeks trip to St John
& the river. We stayed
at several places on

the river & I got a
fairly good idea of the
Summer bird fauna -
Bobolinks & Hudsonian
Chickadees in the same
tree seemed a queer
combination! There is a
good deal that it is smothered
in this sheltered valley.

Hoping you can arrange
to come to Ipswich,

Very sincerely,

Charles W. Townsend

The Washington St. Boston
August 28, 1911.

Dear Brewster,

I am delighted that
you can spend Sunday
September 10th at Ipswich.
As to trains - I shall probably
take the 3.30 train Saturday
afternoon & shall look for you
on that.

Thank you for your criticism
of the title of the Black Duck
paper and I think you are

Entirely right. Perhaps you
can suggest some little
where we meet.

Glover Allen & his wife
have just spent Sunday
with us at Sprinkle, and
a fine mocking bird was
flying about close to the
house when he left. Two
were seen yesterday!

Looking forward with great
pleasure to your visit

Very sincerely
Charles W. Townsend

THIS SIDE OF CARD IS FOR ADDRESS ONLY

1911 - Sept 21. 76 numbers

I said I had not seen jackles Catch
fish. but I find in my notes that
I saw one in the Back Bay Basin splash
its whole body into the water & immerse
with "what looked like a small silver
fish". They are certainly interesting
birds! I'm proud my Sunday with you all
at Spruce very much -
Yes -
C. W. Townsend

76 Marlboro St. Boston

Jan 25. 1912

Dear Brewster,

We missed you very much
at the January feast which
was most interesting, satisfying
and warming. I trust

that your cold is better -

I have just read your Gull
Flight paper with great pleasure,
and as I have heard you read
it twice and have also talked
much about it, I feel fairly
conversant with the subject.

I think you have expressed
the whole thing admirably, &
I suspect that all the theories

You mention may have a
hand in the matter.

It occurred to me that
it might be interesting to
send a reprint of the paper
to an Aeronautical Magazine
& thereby obtain possibly
an interesting review and
criticism.

I have not heard today
from any of the Medicians but
I trust they all perished!

Sincerely,

Charles W. Townsend

Seal Nest Print about $\frac{1}{2}$ way
between Cape Whittle & Harrington.
July 16. 1915.

Dear Brewster

Just a line to tell you
I am having the time of my life
on this trip. Harold St John, botanist,
& I are cruising along the coast in
a little 40 ft schooner under a Captain
who knows every rock & who takes great
interest in following Audubon's steps.
I have his Labrador journal with me
& we read it frequently. We have
been on two islands that had not
been disturbed & where the Capt found
the conditions were the same as
20 yrs ago. Cormorants: double Crested,
about 600 nests on one island and 400
on the other containing eggs & young of all
ages. Many of the old birds allowed us
to come fairly near. Among these on
both islands were one or two thousand
murren - many ring-billed and eggs everywhere.
Razor-billed auks, Black Gull-cots,
Sider & Great Bl. backed gulls on the
periphery. Auks are abundant

everywhere. I have seen 4 or 5
Caspian Terns & the Cape. hopes to
know me an island where they
feed. - le grand esterlet. Today
I visited an island on which
at least 400 Ring billed gulls, ^(meuve) were
feeding, obtained photographs &
eggs, young & adults.

One of my most interesting experiences
was that of spending five days with
M. Johann Berty - the Belgian who
has been in the Coast at Fiandre Bay
since 1896. A most delightful
family - I enjoyed studying his
collection of birds & found no less
than six hitherto unrecorded
for the Peninsula.

You can imagine my time
is well occupied. We have had
much bad weather - one severe
gale but were fortunately in a
secure basin surrounded by islands.
The Captain is a delightful man

one in whom we have the greatest
 confidence. There is a post
 office & telegraph station & fishing
 post here - all in one house
 the only one for miles along the
 coast. A little schooner will

call here in a day or two for
 the mail. It occasionally

gets news of la guerre in an
 official telegram if, as here
 we come to a station. But the

war seems to have passed out
 of our lives to be but a bad
 dream of the past.

We hope to get to Blanc Sablon
 about July 29th & I shall
 take a steamer on the 31st day
 to Newfoundland & so home
 Best regards to all - The Capt
 is going ashore now to mail

Sincerely
 Charles W. Townsend

May 10, 1918.

Dear Brewster,

I am very sorry I did not get to see you before you went away to Concord - but I put it off until it was too late. I was very glad to hear from Harry & Walter that you were better & I am sure the trip at Concord will help you a great deal.

I am planning to get out a Supplement to my Birds of Essex County to appear in 1920 on the 15th anniversary of its original appearance. I have a number

of species to add & a great many dates & notes - the observers in Essex County have increased.

There were no members of the
A.O.U. in the County in 1905
& now there are eight -

I hope the Club will publish
it for me, but I am writing
to you to say that I do not
wish to interfere with the
publication by the Club of
your birds of which I believe
should of course have precedent.
Please let me know.

I intend to bring up the
matter at the Council meeting
next time if you have no
objection.

You will be glad to hear that
we have at last secured plots,
of Bent & Barbours by purchase
& he fitted in to the great group
& you will receive your copy in
due time.

I wish you could have been
at my house when we
celebrated Walter's 70th birthday.
He was as youthful & happy &
cheerful as ever -

I went out to the Annual
Arboretum Wednesday morning Apr
7 to listen to the hooking bird

them & was given a great treat.

He sang and danced magnificently.
I recognized the ^{mimicked} calls & songs of 21 birds
& if my ear had been better I should
have recognized still more. These were
Bluejay, Brown Thrasher, Robin, Song Sparrow,
Flicker, Red eyed Vireo, Red Sh. Hawk
Cat-bird, Bob White, Kingfisher, Brittan
Cock, Carolina Wren, Field Sparrow,
Crow, Wood Pewee, Barn Swallow, ^{Chimney}
Plover, Blue bird, Oriole, Tanager.

Some of the imitations were
brilliantly good.

I also saw & heard a Tennessee Warbler.
I trust you are seeing some good things.
It must be beautiful in Concord now
Don't get moles

Yrs

Charles W. Townsend.

✓ Merula migratoria

Feb 16. 1878 Arlington Mass.

Came upon a flock of 6 or a 700 Robins
(probably more) Found a nest many
feet in a Cedar wood & by the
appearance in the snow, it is probable that
they passed the night here. They were all
uttering their call & alarm notes, frequently
& loudly, many were singing well & were
the first part of their song but not going
further, while two or three were singing
the whole of their summer song. The
noise was great & it sounded very queerly
& I hear the peculiar summer song of
the Robin when the ground was covered
deeply with snow. Most of the
Robins appeared in "pale plumage
from yellow hills".

[Dr. C. W. Townsend]

The mammals of Boston.

Aug. 24th 1903.

Dear Mr. Drane,

Sayornis phoebe 1 shot at

Belmont Nov 15. 1878.

Belmont Oct 17. 1878.

G. trichas "saw me at

Arlington Nov 8th 1879; seen on
ground".

Can you tell me about
two miniature horned larks.
supposedly Prairie sent you by

29 AUG 03 ©

Mr J. L. Bradley taken by him
in Ipswich on August 11^F. He
writes me they were the northern
variety, but I suppose he is
mistaken. I shot at Ipswich

On Aug 13^F a young Prairie
Horned Lark & Hoffman saw
two adults & one young on Aug 9^F

So to him belongs the priority
of discovery. ^{H. was with me on the 13^F also -}
It looks as if

the Prairie H. L. had pushed
on its breeding place to Ipswich.
I have just returned from my
incubation today, but expect to go
down for Sundays.

With you & Mrs. Drane

3

Come down Saturday afternoon
Aug 29th
+ spend Sunday with us?

Mrs. Townsend + I will

be delighted to have you -

Sincerely yours,

Charles W. Townsend
